

Architectural Specification & Floor Plan Report

Project: Modern Luxury Villa Design 3.0 (Primary Elevation & Poolside Layout)

Project Code	MTG-4V68H-000	Design Style	Modern Minimalist / Tropical Luxury
Location	Primary Residential Zone	Total Plot Area	4,500 sq. ft.
Build-up Area	3,800 sq. ft. (2 Floors + Pool Deck)	Status	Approved / Construction Ready

1. Executive Summary & Design Philosophy

The **Modern Luxury Villa Design 3.0** represents a harmonious blend of clean geometric volumes, warm organic textures, and seamless indoor-outdoor living. Designed for optimal natural lighting and cross-ventilation, the structure features expansive floor-to-ceiling glass facades, vertical wooden architectural screening, cantilevered roof slabs, and an integrated private swimming pool deck.

Key highlights of the primary elevation include a striking double-height glass atrium revealing the floating internal staircase, minimalist glass balcony railings, and refined exterior finishes combining smooth off-white stucco with natural timber cladding.

2. Spatial Program & Room Schedule

The villa is meticulously planned across two primary levels plus an outdoor leisure deck:

Floor Level	Zone / Room Name	Approx. Area (sq. ft.)	Key Features & Finishes
Ground Floor	Living & Dining Pavilion	850 sq. ft.	Double-height ceiling, Italian marble flooring, direct pool access
Ground Floor	Modular Kitchen & Utility	320 sq. ft.	Quartz countertops, integrated pantry, premium matte cabinetry
Ground Floor	Guest Bedroom Suite	380 sq. ft.	Attached ensuite bath, private garden view
First Floor	Master Suite	650 sq. ft.	Walk-in wardrobe, private front balcony, luxurious bathroom

First Floor	Children's Bedroom 1 & 2	520 sq. ft.	Shared balcony access, study alcoves, ensuite baths
Outdoor Deck	Swimming Pool & Deck	900 sq. ft.	Infinity edge pool, composite wood decking, lounge area

3. Material & Finishes Specification

- **Exterior Facade:** Weather-resistant elastomeric white acrylic render paired with vertical sustainably-harvested teak wood louvers for solar shading.
- **Glazing:** High-performance double-glazed acoustic laminated glass housed in dark bronze anodized aluminum framing profiles.
- **Flooring:** Large-format 1200x1200mm matte porcelain tiles for interior living zones; slip-resistant fluted granite tiles for exterior pool decking.
- **Railings:** Frameless structural glass balustrades with concealed stainless steel base channels for unobstructed panoramic views.

4. Structural & MEP Engineering Notes

- **Structural System:** Earthquake-resistant RCC framed structure with flat slab construction allowing for clean ceiling profiles and wide cantilever overhangs.
- **Electrical & Lighting:** Integrated smart home automation supporting DALI lighting control, motorized sheer curtains, and perimeter architectural accent lighting.
- **Sustainability:** Provisions for rooftop solar PV array integration, rainwater harvesting filtration sump, and energy-efficient inverter HVAC systems.
